TC001: The First Name is added to the Last Name column.

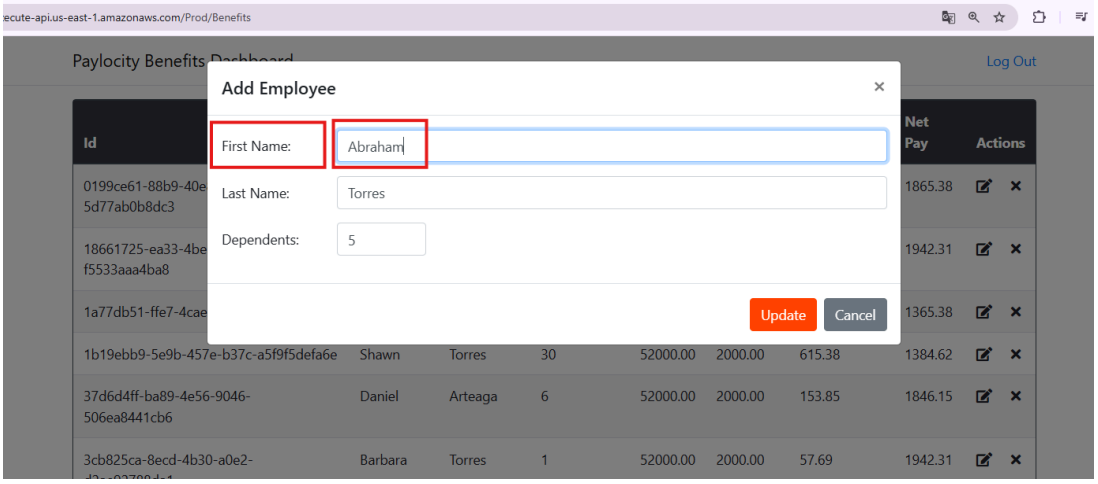
Steps to Reproduce:

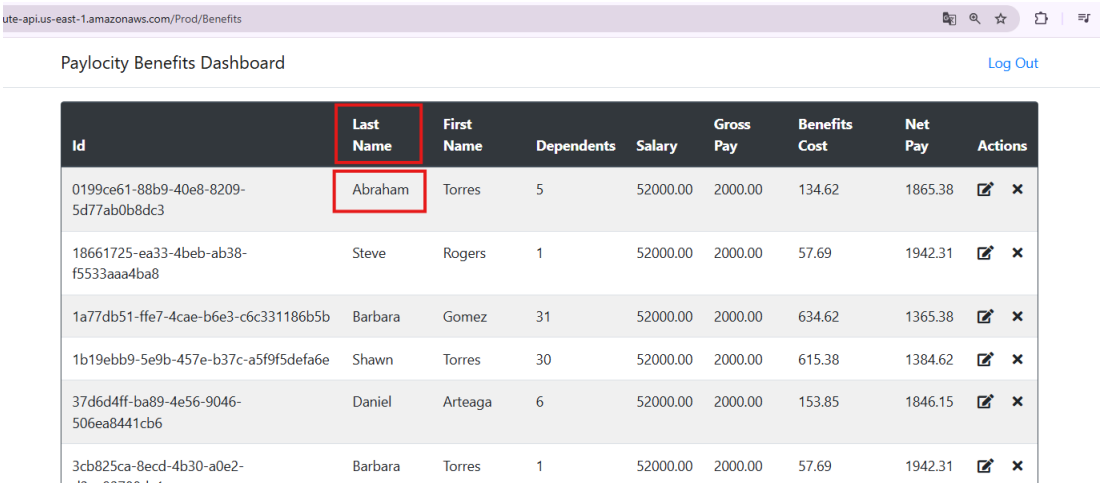
1.Navigate to “Add Employee”.
2.Add First Name.
3.Click “Save”.
4.See the column name in the table.

Expected Result:
The First Name information should be added to the First Name column.

Actual Result:
The First Name is added to the Last Name column.

Evidence:





TC002: The Last Name is added to the First Name column.

Steps to Reproduce:

1.Navigate to “Add Employee”.
2.Add Last Name.
3.Click “Save”.
4.See the column name in the table.

Expected Result:
The Last Name information should be added to the Last Name column.

Actual Result:
The Last Name is added to the First Name column.

Evidence:

TC003: Edit action does not update data correctly

Steps to Reproduce:
1.Create an employee
2.Click “Edit”
3.Modify data
4.Save

Expected Result:
Updated data should be displayed in the table.

Actual Result:
The previous data continues to be displayed.

Evidence:

TC004: Clicking the "Update" button does nothing

Steps to Reproduce:
1.Create an employee
2.Click “Edit”
3.Modify data
4.Click “Update”

Expected Result:
The window should close and update.

Actual Result:
The window doesn't close.

TC005: The "Deleted Employee" window and the "Add Employee" window close when you click outside of them.

Steps to Reproduce:

1.Click the "x" icon, the "edit" icon, or the "Add Employee" button.
2.Click outside the window.
3.Observe the window

Expected Result:
The window should not close unless you click the "Cancel" option or the "x" icon.

Actual Result:
The window closes.

TC006: Visual error when the cursor is displayed when clicking on the text in the table.

Steps to Reproduce:

1.Click on any text in the table.
2.Observe the cursor.

Expected Result:
The cursor should not appear unless you need to add text.

Actual Result:
The cursor appears on the text as if it could be edited.

TC007: Users with duplicate information can be added.

Steps to Reproduce:

1. Click “Add Employee”
2. Add an existing user with the same information.

Expected Result:
A pop-up window should appear informing you that the user already exists.

Actual Result:
Any number of duplicate employees can be added

Evidence:

Add Employee

TC008: The information disappears and the "Log out" option is not displayed.

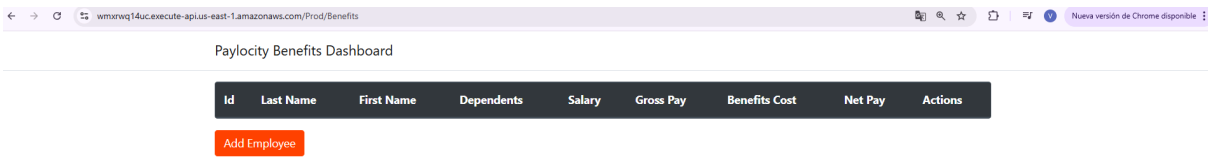
Steps to Reproduce:

1.Please wait a couple of minutes.
2.Double-click outside the table

Expected Result:
The information and the "Log out" option should not disappear.

Actual Result:
If you double-click outside the table, after a few minutes the information disappears and the "Log out" option is not displayed.

Evidence:



TC009: There is no order to the employees in the table.

Steps to Reproduce:

1.Add different employees.
2.View the order of the employees in the table.

Expected Result:
There should be an order in the table, either by the time the user was added (the order would be displayed from the most recent user to the oldest or vice versa) or it could be ordered alphabetically.

Actual Result:
There is no order in the employee table.

Evidence:

TC010: The First Name and Last Name fields allow you to add a Number instead of a String

Steps to Reproduce:

1.Click on the "Add Employee" option.
2.Add a "Number" entry in the "First Name" field.
3.Add a "Number" entry in the "Last Name" field.

Expected Result:
A message should appear saying that numbers should not be entered and it should not allow adding the employee.

Actual Result:
It allows you to add numbers to both fields and add the employee to the table.

Evidence:

TC011: The "Benefit cost" is incorrect

Steps to Reproduce:

1.Click the "Add Employee" button.
2.Add a large number of dependents, for example, more than 30.
3.See the added Benefit Cost in the table.

Expected Result:
Employee: $38.46 per paycheck
Dependent: $19.23 per paycheck

Actual Result:
The displayed deduction values do not match the expected calculation.

Evidence:

Add Employee

TC012: Visual error, the table is cut off on small screens

Steps to Reproduce:

1.Click on the "Add Employee" option.
2.Add a "Number" entry in the "First Name" field.
3.Add a "Number" entry in the "Last Name" field.

Expected Result:
The table should not retain its shape on any screen

Actual Result:
The table layout breaks on smaller screen sizes.

Evidence:

TC013: Edit action does not update data correctly

Steps to Reproduce:

1.Create an employee
2.Click “Edit”
3.Modify data
4.Save

Expected Result:
Updated data should be displayed in the table.

Actual Result:
Old data remains or only partial updates occur.

Evidence:

Add Employee

TC014: Employee not displayed after creation

Steps to Reproduce:

1.Navigate to “Add Employee”
2.Enter valid data
3.Click “Save”

Expected Result:
The employee should appear instantly on the table.

Actual Result:
The employee only appears after refreshing the page.

TC015: The employee is not deleted correctly every time.

Steps to Reproduce:

1. Go to option “x”
2. Click on “Deleted”

Expected Result:
The employee should be deleted from the table immediately.

Actual Result:
The employee is only deleted sometimes, after refreshing the page.
